

## ARENA SHOWS

### TITAN

Making his annual appearance at the Exhibition this year due to incredible demand. A show to entertain both young and old alike - Titan is transported around the Arena on a docking station driven by the Man in Black.

After some adjustments to the controls, Dave the Man in Black 'fires up' the equipment and brings Titan to life - much to the shock of the audience! This performance is not to be missed. Seeing is believing!

Titan has appeared in many European countries including Ireland, Spain, France, Czech Republic, Belgium, Sweden and Germany. Titan has also appeared across the globe including performances in China, Hong Kong, USA, Dubai, Saudi Arabia, Oman and Doha.

### W5 - LIGHT FANTASTIC SHOW

W5 are back for BTYSTE 2015 and are exploring your universe on the main stage with science at the speed of light!

From infrared to ultra-violet, the visible spectrum will have nowhere to hide from our watchful eyes. Celebrate the start of UNESCO's International Year of Light with this truly enlightening experience.

W5 will also provide opportunities for you to get hands-on with science. Pit yourself against physical challenges, wrap your head around mental puzzles or just try out some fun activities as YOU do the science at the W5 stand.

### THE RONEY & JOE SCIENCE SHOW

Roney and Joe are not only two of the brightest young Irish scientists in the fields of astrophysics and chemistry... they are also best friends.

They are being unleashed from their labs in Trinity College so that they can bring the Science Gallery Dublin live show experience to the RDS stage. This explosive, messy show will demonstrate just what it means to be a scientist. Using cutting-edge demonstrations and an explosive flair for the unexpected, they will take you on an interactive journey from the formation of the universe to the formation of friendships.

## CONCERT HALL

### STELLAR ADVENTURES 3D

Beginning aboard the International Space Station, we will view our Spaceship Earth from a vantage point of 430km above our home in space and hear of how we use this unique vantage point and technological stepping stone to the stars to monitor and care for our fragile blue planet.

Audiences will then be taken on an impossible journey back through a wormhole to the beginning of time itself, to witness the dramatic birth of the universe, stars and formation of the Solar System.

Through live narration and stunning 3D, you will learn how we all use space every day to communicate and navigate our way and how space has transformed society forever for the betterment of all mankind.

Finally, we will try to answer the question, 'How big is the universe?'. We will travel through space and time to see just how big the universe really is.

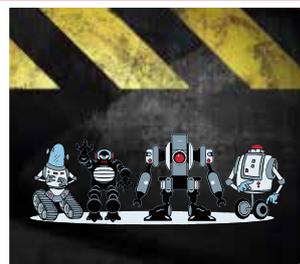

Come and join us for this incredible 3D journey through the cosmos!

## BIG TOP

### WORLD OF ROBOTS IN ASSOCIATION WITH BANK OF IRELAND

The World of Robots is the largest open robot competition and robot display in Ireland. If you are interested in robots, and who isn't, then this is the place to be. The best minds from around the world are invited to compete their robots in different events: Heavy weight combat robots, fire-fighters, LEGO bots, hockey bot, walking humanoids, soccer bots, sumo bots and even boxing androids. Some robots are autonomous, some are large, and some small- but they're all cool! Join the stands filled with people watching the purpose built arena where 100 kilo robots flip and smash into each other and androids climb over ropes or box in metal on metal mayhem. You will also see educational robotics demos and displays of exact and working replicas of famous robots such as R2-D2, the Daleks and even a Creeper from Minecraft ssssssssss! The World of Robots is an exciting and noisy environment. If you are bothered by flashing lights, loud noises, screaming children or robots brutally destroying each other, then this may not be for you. Otherwise prepare for a technological extravaganza!
